

MPI ANNOUNCES THE INFLATION FIGHTER

The Model 88T Printer is a low cost, self-contained unit designed for personal computers and small business systems. Complete with a dual parallel/serial interface and user selectable tractor or friction paper feed, it prints a 7x7 matrix 96 character ASCII set bidirectionally in either 80, 96, 120 or 132 column formats on roll or fan-fold paper with a thruput of 60 LPM. The unit includes forms handling and a two-line buffer or optional 1K/2K buffer.
